MARK SAGER
PRIMARY EXAMINER

Examiner's Amendment

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. David Sitrick on Nov. 30, 2001.

2. The application has been amended as follows:
Claim 15, line 3, deleted 'rotoscoping'.

Priority

3. From application file, it appears the application was filed under Rule 1.53 as a new application without reliance upon an earlier filed application rather than a continuing application. This is apparent by filed declaration not referencing any earlier filed application which may have been co-pending despite reference. However, the specification contains statement of application being a continuation to a prior application. Based upon prior Interviews incorporated herein and the statement at line 1 of specification, Examiner believes Applicant desires the benefit of earlier filing for this application. Upon reconsideration and review of Rules regarding Continuation application and New Matter Issue, despite Examiner's statement during interview on June 11, 2001 and paragraph 3 of prior action mailed June 14, 2001, there is no authority for such amendment, and as such, the change --in-part-- after continuation has not been entered.

Information Disclosure Statement

4. It is unclear from record as to why the Electronics Engineers Handbook Section 23, Electronic Data Processing was submitted with Amendment received Sep 20, 2001 since it has not been identified on 1449 or remarked in Applicant's Papers. It remains in the file, but has not been considered. Additionally, cited Amendment references an International Report; however, no report was attached.

Drawings

5. The proposed drawing correction and/or the proposed substitute sheets of drawings, filed on Sep 20, 2001 have been accepted. Further, drawing corrections, although lengthy, comply with requirements for not entering new matter.

Specification

6. For the record, changes to specification resultant to drawing changes (supra) complies with requirements for not entering new matter; although, it is noted for Applicant's future reference, typically such lengthy amendment to specification is more properly conducted with substitute specification and declaration.

Allowable Subject Matter

7. Claims 1-32, 34-53 and 55-75 are allowed.

Conclusion

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to M. A. Sager whose telephone number is (703) 308-0785. The examiner can normally be reached on T-F from 0700 to 1700. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Ms. Valencia Martin Wallace, can be reached on (703) 308-4119. The fax phone number for this Group is (703) 305-3580. Any inquiry of a
